

CONTENTS

Foreword, by Leo Sayavedra, *vii*

Acknowledgments, *ix*

Introduction, by Jim Norwine, John R. Giardino, and Sushma Krishnamurthy, *xi*

Part I. Texas Water in the Past, Present, and Future, 3

1. A Half Century of Water Resource Planning and Policy, 1950–2000, by Joe G. Moore, Jr.,
5
2. Texas Water at the Century's Turn: Perspectives, Reflections, and a Comfort Bag,
by George H. Ward, Jr., 17
3. Administration and Modeling of the Water Rights System, by Ralph A. Wurbs, 44
4. Water Use Patterns and Trends: The Future in Texas, by Rima Petrossian, 52

Part II. Regional Assessment, 63

5. Water Resources of the Panhandle and Upper Colorado Regions of Texas,
by Lloyd V. Urban and A. Wayne Wyatt, 65
6. Major Water Issues Facing South-Central Texas, by Richard A. Earl
and Todd H. Votteler, 75
7. The Present and Future Status of Water in the Coastal Bend Area, by C. Alan Berkebile,
Karen K. Dodson, Rick Hay, and James A. Dodson, 89
8. Houston Water Issues, by Philip B. Bedient, Hanadi S. Rifai, Monica P. Suarez,
Rik M. Hovinga, and Burke Nixon, 107
9. Status and Trends of North-Central Texas Water Resources: The Integrity of the Trinity
River, by Glenn C. Clingenpeel, 122

Part III. Climate and Water Quantity, 135

10. Will We Have Enough Water? An Overview, by Jurgen Schmandt, 137
11. Water and Climate Change in the Twenty-first Century, by Gerald R. North, 144
12. Climate and Water: Precipitation, Evapotranspiration, and Hydroclimatological
Aspects, by David R. Legates, 149
13. The El Niño/Southern Oscillation and Impacts on Climate Anomalies in Texas,
by Kent M. McGregor, 153
14. Influence of Climatic Variability on Texas Reservoirs, by Alan W. Groeger, Bruce G.
Kelley, and Joe Martin, 159
15. Landscape Water Conservation through Xeriscape, by Douglas F. Welsh, 164
16. Changes in Flow Regime following Dam Construction, Yegua Creek, South-Central
Texas, by Anne Chin and Jean Ann Bowman, 166

Part IV. Water Quality, 179

17. Using a Geographic Information System to Identify Impacts from 4,200 Closed Municipal Solid Waste Landfills, by Robert D. Larsen and Ronald J. Stephenson, 181
18. Nonpoint-Source Pollution from Silviculture in Texas, by Michael G. Messina and R. Scott Beasley, 185
19. Long-Term Trends in the Water Quality of Barton Springs, Austin, Texas, by Martha A. Turner and David A. Johns, 200
20. Educating the Public about Water Resources Research at Texas Universities, by Ric Jensen, 210
21. Reuse as a Viable Option in Water Resource Development: A Discussion of the Legal Framework Governing Reuse Projects, by Edmond R. McCarthy, Jr., and Michael A. Gershon, 218

Part V. International Issues in the Rio Grande Valley, 227

22. Water Resources of Far West Texas: El Paso–Ciudad Juarez, by Robert H. Schmidt, 229
23. Geographical Hydrology of the El Paso–Ciudad Juarez Border Region, by Richard A. Marston and William J. Lloyd, 242
24. Instream Salinity Modeling of Mid–Rio Grande and Wichita Basins, by R. S. Muttiah, S. Miyamoto, M. Borah, and C. H. Walker, 249
25. Water in the Lower Rio Grande Border Region: A Binational Perspective, by Mitchell L. Mathis, 273
